INTRODUCTION

A toaster's fuse will often fail over time. This guide will show you how to fix your toaster.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
- [Pincers](#) (1)
- [Spring Clamps](#) (1)

PARTS:

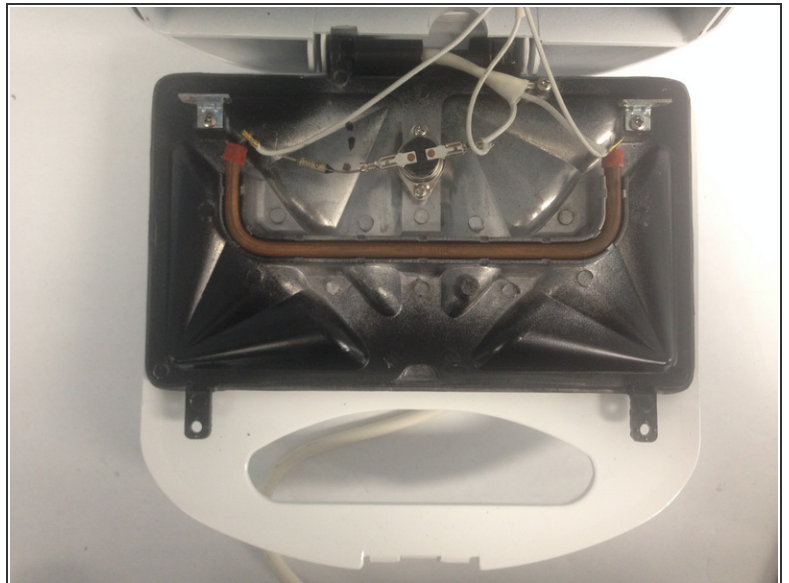

- [Thermal fuse 10A 250V Tf225C](#) (1)

Step 1 — Thermal Fuse

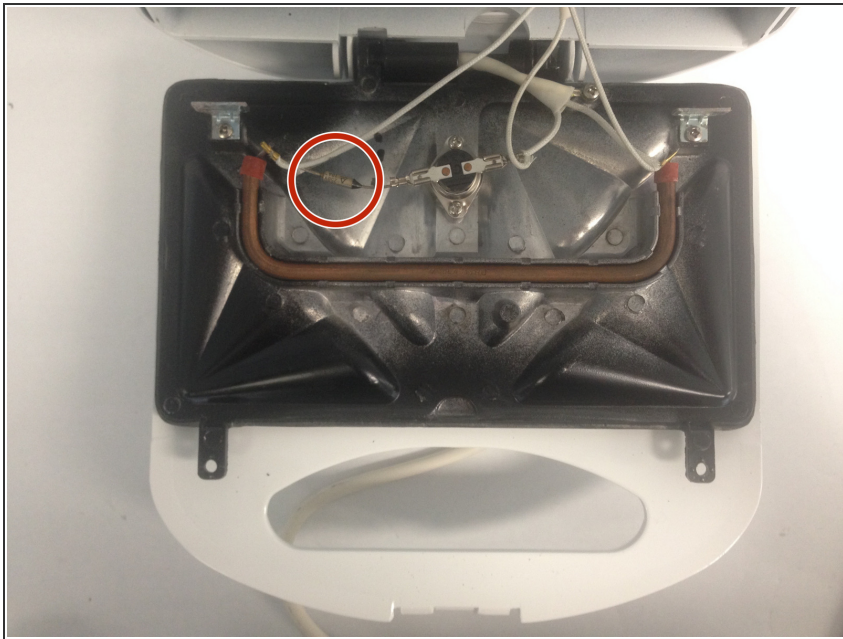

- Open the toaster.
- Remove the four screws which attach the mold.

Step 2

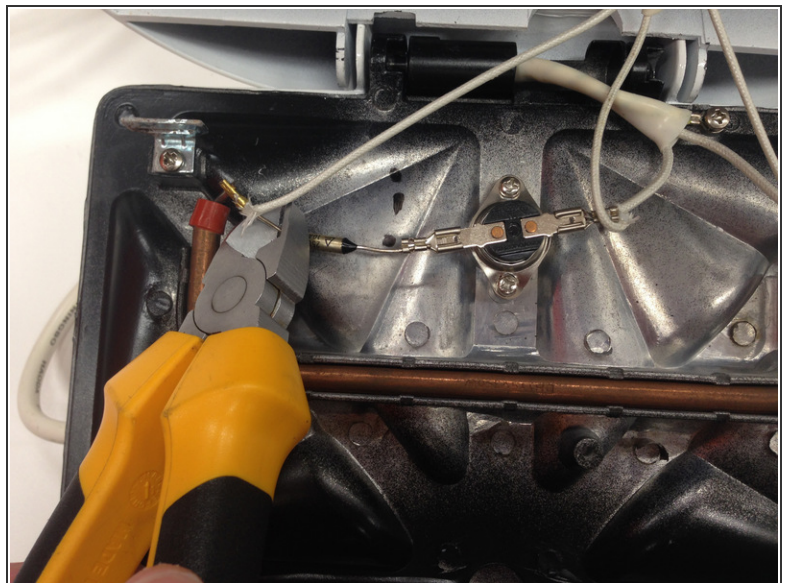

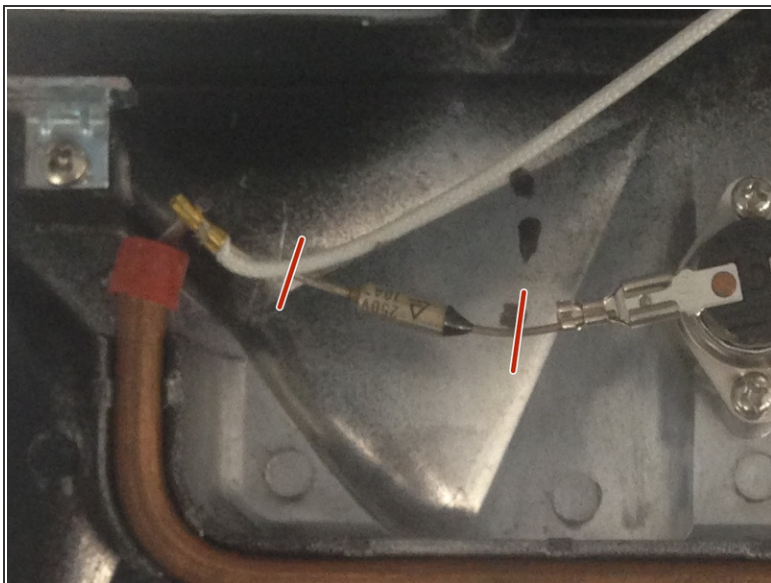

- Remove the mold to get access to the heating coil.

Step 3

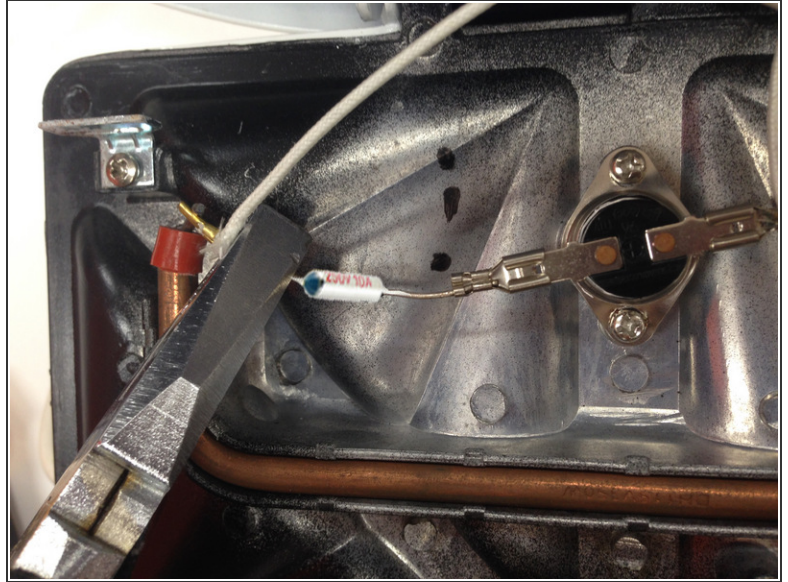

- Find the thermofuse.

Step 4

- Cut the two wires that connect to the thermal fuse.

Step 5

- Align the thermal fuse with the open wires.
- Put the spade connectors over the wires.
- Using pliers, clamp the wires together.

Step 6

- Replace the molds.
- Replace the four screws which attach the mold.
